

## **Professional Vocational Training Limited (Distance Learning)**

### **About Professional Vocational Training Limited**

Professional Vocational Training Limited has been supported learners to achieve their full potential in the legal sector for almost 10 years.

### **Courses offered by Professional Vocational Training Limited**

Our programmes are delivered via blended learning, giving you the flexibility to study when it is convenient to you, but with the ongoing support of a personal tutor to help, guide and support you through your studies. Professional Vocational Training Limited is based in the Midlands but supports learners nationwide using videoconferencing and tutorials, e-learning and tutorial support. We offer the Level 4 Conveyancing Technician course and the Level 6 Licensed Conveyancer course. At present there are two options available to achieve the Conveyancing Technician qualification:

- Via a blended learning programme, where learners are supported through personal tutorials, face to face teaching and video and e-learning support. The fees for this route are all inclusive there are no hidden extras chargeable and can be paid in one lump sum, or via instalments by standing order or via credit card.
- Via the Apprenticeship standards for Conveyancing Technicians Level 4 scheme, either via the Levy for qualifying employers or by a 5% contribution to the programme fee for employers not included in the Levy system. We can provide advice and guidance as to which route a firm may be eligible for.

Support for the units includes: a course manual plus additional tutor prepared notes and support materials; entry for final assessment for the unit, certification as appropriate.
